L.O: To double and halve.

LO: To count in 2s.

	<u>Independently</u> Skills practice I practised this skill by myself after I was taught how to do it or after we talked about how to do it well.	<u>OR Guided</u> I needed a lot of support with ... I was supported at times with ... I needed no help at all.	Teacher / TA/ Supply <input type="checkbox"/>	tools used
--	---	---	--	------------

Count in 2s and colour in the grid:

1	2	3	4	5
6	7	8	9	10
11	12	13	14	15
16	17	18	19	20
21	22	23	24	25

How many ears are there?

a)  _____ x _____ = _____

b)  _____ x _____ = _____

Make some bottle top counters to order your 2s.

L.O: To double and halve.

LO: To recognise multiplication as repeated addition.

LO: To multiply using arrays.

Independently Skills practice I practised this skill by myself after I was taught how to do it or after we talked about how to do it well.	OR Guided I needed a lot of support with ...	CT/ TA <div style="border: 1px solid black; width: 40px; height: 40px; margin: 10px auto;"></div>	tools used
	I was supported at times with ...		
	I needed no help at all.		
Double these numbers Double 4 = Double 3 = Double 2 = Double 5 = Double 1 =		Halve these numbers Half of 10 = _____ Half of 8 = _____ Half of 2 = _____ Half of 6 = _____ Half of 4 = _____	

Snow white gives each dwarf a bag of 2 apples. Can you help her count the apples.

We can use multiplication to help us with repeated addition.

So instead of saying

1. $2 + 2 + 2 + 2 =$

This is the same as 4 groups of 2 =

We can work this out by drawing a line around each vertical group
(Each group is called an array)

write this as
 $4 \times 2 = 8$

We
can

It is really important that the number of groups is written first and the number in each group is written second in the sentence.

Now write these sentences as multiplication sentences and
draw out the groups of apples to solve each one.

1. $2 + 2 + 2 + 2 + 2 =$

$5 \times 2 =$

2. $2 + 2 + 2 + 2 + 2 + 2 + 2 =$

$\underline{\quad} \times 2 =$

3. $2 + 2 + 2 =$

$\underline{\quad} \times \underline{\quad} =$

4. $2 + 2 + 2 + 2 + 2 + 2 =$

$\underline{\quad} \times \underline{\quad} =$

5. $2 + 2 + 2 + 2 + 2 + 2 + 2 + 2 =$

$\underline{\quad} \times 2 =$

Double these numbers			Halve these numbers		
Double 4 =			Half of 10 = _____		
Double 7 =			Half of 18 = _____		
Double 9 =			Half of 12 = _____		
Double 5 =			Half of 16 = _____		
Double 6 =			Half of 14 = _____		

Snow white gives each dwarf a bag of 2 apples. Can you help her count the apples.

We can use multiplication to help us with repeated addition.

So instead of saying

2. $2 + 2 + 2 + 2 =$

This is the same as 4 groups of 2 =

We can work this out by drawing a line around each vertical group
(Each group is called an array)

We can write this as
 $4 \times 2 = 8$

It is really important that the number of groups is written first and the number in each group is written second in the sentence.

Now write these sentences as multiplication sentences and **draw out the groups** of apples to solve each one.

1. $2 + 2 + 2 + 2 + 2 =$

$5 \times 2 =$

2. $2 + 2 + 2 + 2 + 2 + 2 + 2 =$

$\underline{\quad} \times 2 =$

3. $2 + 2 + 2 =$

$\underline{\quad} \times \underline{\quad} =$

4. $2 + 2 + 2 + 2 + 2 + 2 =$

$\underline{\quad} \times \underline{\quad} =$

Can you work out what has changed and how we should write this sentence now?

5. $5 + 5 + 5 =$

$\underline{\quad} \times \underline{\quad} =$

Use the groups to help you.
