

Year 2 Home learning Tuesday 30th June 2020

Here are some more multiplication and division real life word problems. Read them carefully and decide if you will have to \times or \div . Write the number sentences and then draw pictures to help you figure out the answers.

Share out 8, 10, 12, 16 and then 20 grapes fairly between 2 groups. How many do they get each?

- 1, Grandma had 8 baskets with 5 apples in each. How many apples did she have altogether?
- 2, Grandma picked 9 flowers that each had 10 petals. How many petals was that altogether?
- 3, The coat that Grandad wore had 2 pockets. In each pocket were 14 sweets. How many sweets did he have altogether?
- 4, Mum shared out 16 grapes between herself and Dad. How many did they get each?
- 5, Mum, Dad and their three children shared out 35 strawberries. How many did they get each?

- real life problems with money
