

Our New Learning Environment

Staff and children at Grange Infant School have worked hard to create an engaging environment that supports, promotes and celebrates children's learning. We believe that a creative and stimulating environment has a great impact on the quality of teaching and learning, therefore contributing to raising standards. It both supports and enriches the learning of all children. We take great pride in our school being vibrant, welcoming and engaging.

Our classroom displays support the children to become independent learners. Each classroom has a fun but cosy book corner, linked to their current topic to create a love of reading and to extend their learning. Working walls help to scaffold and support the children's learning as well as showing the children their learning journey. The children regularly refer and contribute to these throughout the lessons.

Year R have recently improved both their indoor and outdoor areas. The classrooms have been fitted with new flooring and safety doors. Their playground has numerous role play areas, from a new (now not so clean!) mud kitchen to a vibrant boat. 😊

We are continually striving to improve our environment and have plans in place for a vegetable garden and a new feature for our school entrance to celebrate our love of creativity and reading at Grange Infants. Watch this space!
