

Year R maths Home learning Friday 5/6/2020

Because it's Friday let's have fun by playing Mathletics.

Let me remind you that there is more to Mathletics than just the learning tab.

If you use the **explore** tab you will find lots of cool and informative videos to watch.

If you use the **play** tab you will link to ;

Live Mathletics

This is where your child can play anonymously against children from all over the world or in their class. They can build up their fluency, as they quickly have to calculate the correct answer. If you find they are winning all the time, you can manually change the level they are working at. See the image below.

Rainforest maths

Here, your child can access all types of maths games.

Play Paws

This is an engaging section all about addition and subtraction.
